

# Colin Troisemaine

PhD, Data Scientist

[colin.troisemaine@gmail.com](mailto:colin.troisemaine@gmail.com) | [linkedin.com/in/colin-troisemaine](https://linkedin.com/in/colin-troisemaine) | [github.com/ColinTr](https://github.com/ColinTr)

## EDUCATION

<b>IMT Atlantique</b> <i>Doctor of Philosophy in Computer Science</i>	Brest, France Oct. 2021 – Sept. 2024
<b>Sherbrooke University</b> <i>Master's Degree in Computer Science</i>	Sherbrooke, Canada Sept. 2020 – Aug. 2021
<b>Polytech Tours</b> <i>Engineering Degree in Computer Science</i>	Tours, France Sept. 2016 – Aug. 2021

## EXPERIENCE

<b>Data Scientist</b> <i>AMIAD (Agence Ministérielle pour l'IA de Défense)</i>	Jan. 2025 – Today Bruz, France
<b>PhD in Machine Learning</b> <i>IMT Atlantique / Orange Innovation</i> <ul style="list-style-type: none"><li>Developed 4 original techniques to discover novel classes in an unlabeled set of tabular data</li><li>Presented complex concepts to diverse audiences through accessible presentations at conferences</li><li>Realized an extensive state of the art on novel class discovery techniques, which received 15 citations in one year</li><li>Collected and curated a dataset of 500,000 real internet access faults and engineered 700 new features</li></ul>	Oct. 2021 – Sept. 2024 Lannion, France
<b>End-Of-Study Research Internship</b> <i>Orange Innovation</i> <ul style="list-style-type: none"><li>Designed a new way to create descriptive features to improve regression performance</li><li>Developed a parametric framework that can make use of 4 different classification models to generate features to improve the performance of 5 regression models</li><li>Published an analysis of the results along a positioning to the SOTA in a 12-page conference paper</li></ul>	May 2021 – Sept. 2021 Lannion, France

## PROJECTS

<b>Interactive Interface for Novel Class Discovery</b>   <i>Python, Flask, React, Plotly</i> <ul style="list-style-type: none"><li>Developed a web application using Flask to serve a REST API with React as the frontend</li><li>Implemented various clustering and novel class discovery algorithms</li><li>Created data visualization functionalities with Plotly and PDF decision trees</li><li>Featured this work in a paper at the ECML PKDD 2023 Demo Track</li></ul>	June 2021
<b>PracticalNCD</b>   <i>Python, PyTorch, Git, Wandb, Pandas</i> <ul style="list-style-type: none"><li>Designed a new state-of-the-art deep learning model for the discovery of novel classes</li><li>Optimized the hyperparameters of 3 complex models on 7 datasets with a custom experiment tracking framework</li><li>Compared 11 scores to estimate the number of clusters in an unlabeled set in different scenarios</li></ul>	Dec. 2023

## PUBLICATIONS

"A Practical Approach to Novel Class Discovery in Tabular Data", Data Mining and Knowledge Discovery journal	2024
"Novel Class Discovery: an Introduction and Key Concepts", under review at Neural Computing and Applications (NCAA) journal	2023
"A Method for Discovering Novel Classes in Tabular Data", IEEE International Conference on Knowledge Graph (ICKG)	2022
"Construction de variables à l'aide de classifieurs comme aide à la régression", Extraction et Gestion des Connaissances (EGC)	2022

## TECHNICAL SKILLS

**Foreign languages:** French (native language), English (TOEIC level C1 - Expert, 965/990 points, 2018)  
**Programming languages:** Python, SQL (Postgres, Bigquery), JavaScript, HTML/CSS, LaTeX  
**Frameworks:** PyTorch, Pandas, Numpy, Scikit-learn, Jupyter, Matplotlib, Weights&Biases, React, Node.js, Express.js  
**Developer Tools:** Git, Docker, Google Cloud Platform, PyCharm, IntelliJ, PhpStorm, Eclipse  
**Hobbies:** Chess, guitar, 3D printing, FPV drone flight
